

TENNESSEE

HOME SERVICES

Your Regular Pool Maintenance Service – What’s Included

At **Tennessee Home Services**, we keep your pool clean, safe, and swim-ready so you can simply enjoy it without the hassle. Every visit follows our detailed checklist to ensure consistent, crystal-clear results.

Physical Cleaning & Debris Removal

- Skim the surface to remove floating debris (leaves, bugs, pollen)
 - Empty skimmer and pump baskets for optimal water flow
 - Brush pool walls, steps, and waterline tiles to prevent algae buildup
 - Vacuum pool floor to remove dirt, sand, and fine debris
-

Water Chemistry Testing & Balancing

We test and balance essential water parameters for clarity, comfort, and safety:

- **Alkalinity** – Prevents pH fluctuations and corrosion
 - **pH Level** – Maintains swimmer comfort and chemical efficiency
 - **Cyanuric Acid (Stabilizer)** – Protects chlorine from UV breakdown
 - **Chlorine** – Disinfects and keeps water safe for swimming
 - **Muriatic Acid** – Adjusts alkalinity and pH when needed
 - **Salt Levels** (*for saltwater pools*) – Ensures correct chlorination
-

Circulation & Filtration Check

- Inspect pump operation for proper water circulation
- Monitor filter pressure and performance
- Check return jets for correct direction and flow

Final Quality Check

- Confirm water clarity and sparkle
- Ensure all equipment is functioning properly
- Report any concerns or recommended repairs to the homeowner

 **Tip:** Consistent professional maintenance not only keeps your pool beautiful, but also extends the lifespan of your equipment and reduces costly repairs.
